does not appear in menu Hi all I was trying to install office 2016 tool kit but it was not appearing in the add/remove program option. I ran the installer again but still it was not appearing. I have tried to clean the registry and browser cache but it was not working. A: You have two issues: Your path is wrong. You did not wait until the install finished. The path to the MS Office add-in is wrong. This path will be used by the installer to search for the add-in: C:\Program Files (x86)\Microsoft\Office\Office16\Outlook.exe\TOOLS It is not C:\Program Files (x86)\Microsoft\Office16\Tools.exe but you already installed the toolkit there. Use the correct path instead: C:\Program Files (x86)\Microsoft\Office\Office16\Tools.exe\TOOLS It is probably an installation error. Wait until the install finished before trying to start again: Open a cmd prompt. Go to the installer directory. Enter the command: Start /wait to force a wait until the install finished. msie: /i "C:\Program Files (x86)\Microsoft\Office\Office16\Tools.exe\TOOLS\OfficeAddInsSetup_x86_en-us.msi" /qb Do you like having your toes picked clean by a giant vicious dog? No? Well you probably won't like this. That is unless you get the video of a dog named Koda picking the bones out of his owners' feet. I would not want to be in that position at all but this was worth it. What a wonderful pup. I've seen other videos where they accidentally leave their hands unattended for seconds while they are shopping in a store. Well it's obvious there's no happy ending for these people because there is no video of them finding it either. What a guy! [Two cases of trochlear meningioma]. Meningioma is the second most common neoplasm in the central nervous system after the glioma. Most meningiomas are benign neoplasms. The aggressive meningiomas show the usual clinical features of intracranial meningioma. The most frequent location of the aggressive meningiomas are found in the skull base or 82157476af
